DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: with respect to claims 1, 27-28 and 30-31, in addition to other limitations in the claims, the prior art fails to teach, disclose or render obvious the applicant's invention as claimed, particularly the feature describing:

- wherein said at least one output bypass path does not travel through a multiplexer between said plurality of LES and said at least one I/O block.

- programmable bypass circuitry for selectively conveying a signal from one of the logic circuits to the I/O circuit in lieu of a signal from the routing circuitry without traveling through programmable routing circuitry between said plurality of LES and said at least one I/O block.

- providing a direct connection between said at least one I/O block and one of said plurality of segmented routing conductors dangling at the boundary of said routing architecture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patel (5,317,210) discloses an I/O cell, logic array blocks, input/output multiplexer and a direct connection from I/O pad to an input multiplexer of a logic block which is input signal from external source, but there is no direct connection from an output of the logic block to the I/O cell.
